

REIS SUBMARKETS: PUSHING THE BOUNDARIES FOR APPRAISERS

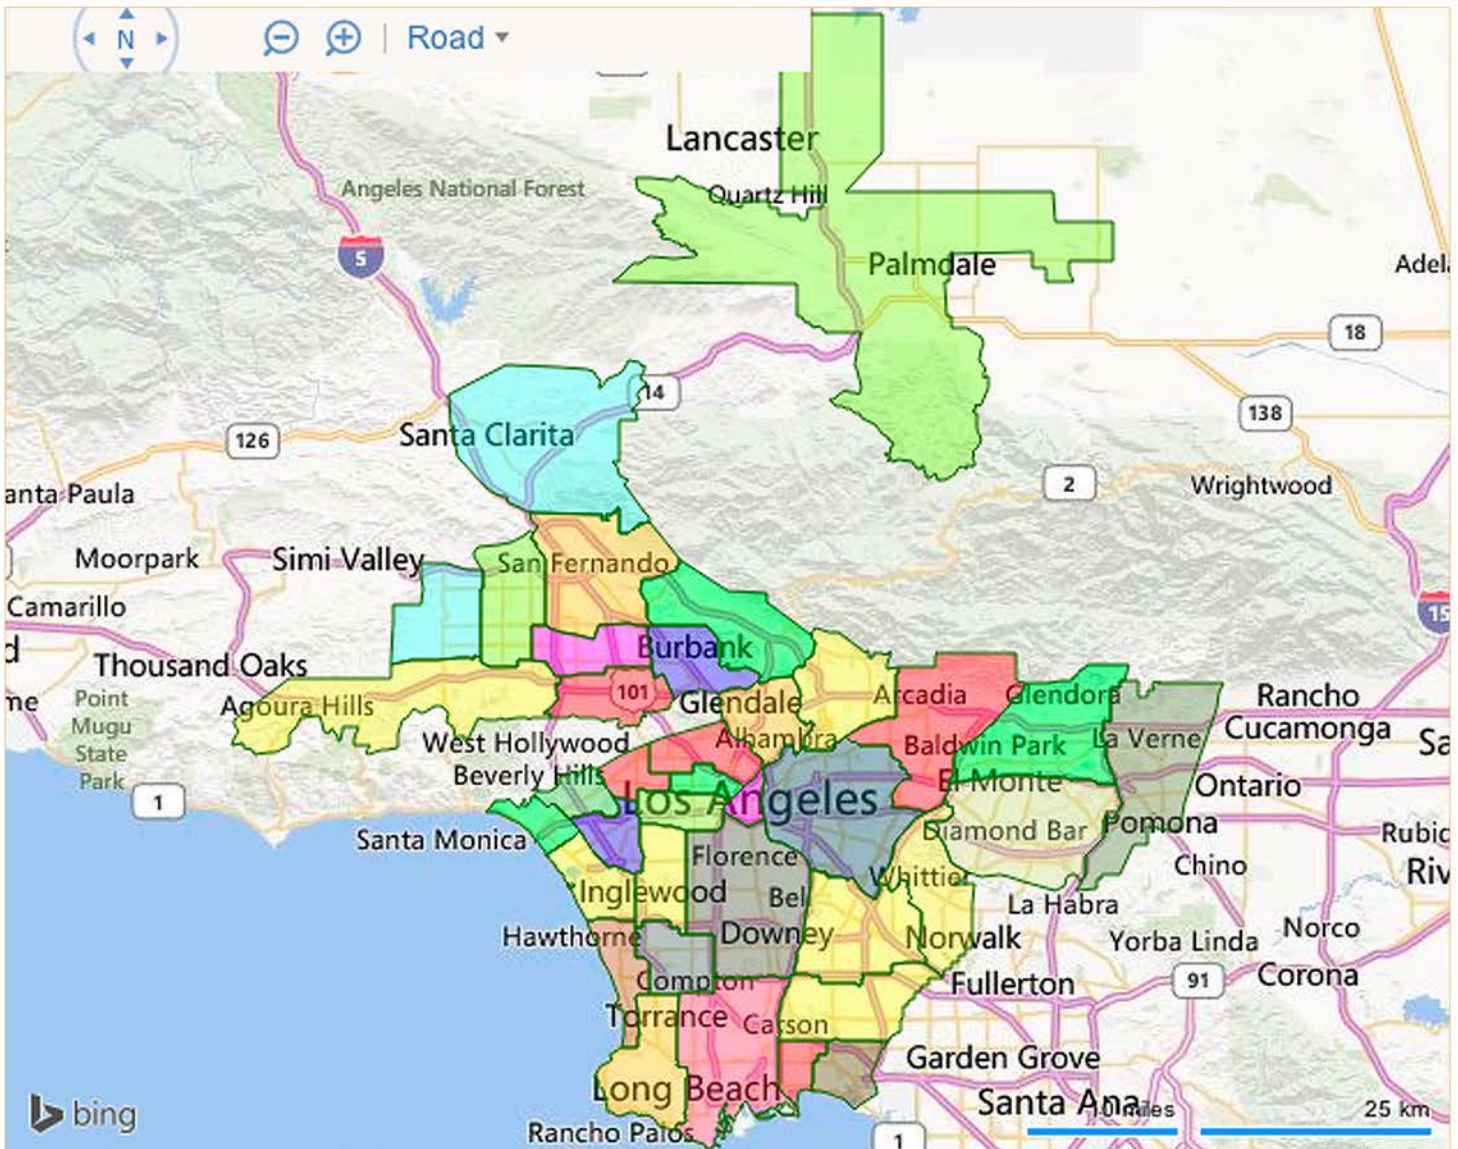

You understand how important it is to have clearly defined and accurate competitive submarkets. Over the past 30 years, Reis has refined its submarket boundaries to reflect geographic, man-made, real estate and eco/demo parameters. Competitive stock within a submarket is built up from property level observations at the street level allowing appraisers, banks and investors to trust our market performance information.

Of course, submarket boundaries and names change based on property types ensuring that Office submarkets are very different than Apartment, Retail, Self Storage, Warehouse/Distribution or Flex/R&D submarkets.

Below are a few examples of our submarket coverage by property type and major market. To find out which submarkets we cover in your area, please use our easy to use map-based navigation ([www.ReisReports.com/real-estate-market-report](http://www.ReisReports.com/real-estate-market-report)) or call us at 1-855-855-7347.

Los Angeles, CA
